

Medication Therapy Management Program

As a member in our Medicare plan, you may be eligible for participation in a Medication Therapy Management Program. This program is designed to improve your medication use and reduce the risk of adverse drug reactions. In order to be eligible, you must have multiple medical conditions, be routinely taking multiple covered Part D drugs, and be likely to spend over \$3,000.00 on Part D drugs per year. Once enrolled into the program, you will receive an introductory letter and participation form. Annually, you will receive a Comprehensive Medication Review, providing one-on-one telephone communication with a pharmacist. Together, you will review all your medications to identify any concerns. Your medications will be reviewed quarterly thereafter to try to identify new or unresolved medication issues. Based on these communications and reviews, you may receive additional written materials. Your physician may also be made aware of any concerns. For additional information, please contact Network Health Insurance Corporation at 1-800-378-5234.
